TUSKAN BALE CLAMP

TUSKAN BALE CLAMP

About

The Tuskan Bale Clamp is designed and built by the Wallace family - fourth-generation farmers and second-generation manufacturers of farm equipment from Cowra NSW. As farmers they are committed to reducing the risks of operating machinery, while introducing better systems that save time and increase efficiencies. As engineers they've been building farm equipment for over 20 years, so they know how to build machines that can withstand the rigours of day-to-day use on the farm.

Features

The Tuskan is **Australian Designed, Proven and Made**. Its the first feed handling attachment of its type in the world. It enables you to clamp, lift and turn the bale on its side - so you can cut the hay bale strings well away from the mixer. You can then re-clamp and drop the bale into the mixer saving you time, but most importantly - guaranteeing your safety.

You can **re-clamp** and drop the bale into the mixer from the **comfort and safety** of your seat.

Has the ability to handle **Square and Round Bales, Silage, Wool Bales, Tyre's and Wrapped Bales.**

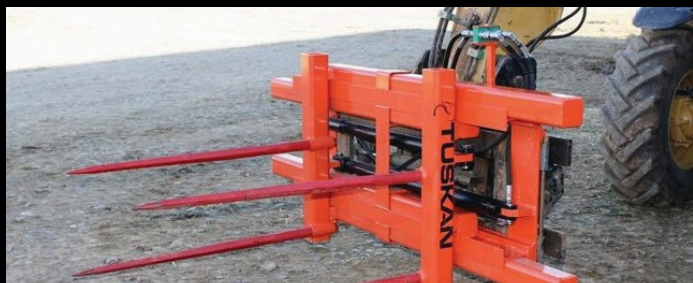

Four spikes laid out in a 2x2 formation **increases stability** when transporting material.

Specifications

Spikes	4 spikes - 2 x 2 formation
Spikes Length	980 mm, 1250 mm, 1400 mm
Hitch Type	Euro, JD, AusHitch, Volvo, Merlo, CAT (others available upon request)
Hydraulics	Single set of remotes
Standard Width	1600 mm
Spike Width Travel	900 mm to 2750 mm
Height without Apron	850 mm
Height with Apron	2170 mm
Weight	390 kg

APPLICATIONS

The Tuskan Bale Clamp is the simple solution to a dangerous, messy and slow job. It is the perfect attachment for many tasks, helping you save time, money and effort.

The Tuskan Bale Clamp can go up to 2.75m wide. This versatile attachment has the ability to pick up bales and tires all **shapes and sizes with ease**.

Loading Mixer Wagons from the safety of your seat, eliminates the risk of you falling in while cutting the strings.

When you cut the strings, while clamped, the bale **holds its shape**, reducing the risk of dirt mixing in with the feed.

Slide on Soft Hands (optional extra) for wool, rounds and silage.

Using the clamping function, you can **drop bales over fences** avoiding the need to go into each paddock separately.
